Prayer Request:

---

Please pray for me for healing and deliverance. I have been diagnosed of having a large tumor on my uterus and my doctor has recommended me for surgery. I am praying that God will lay His healing hands on me and wholly intervene in this situation. If it is His will that I go through with the surgery, I pray for His guidance, and that he will take complete control over doctors and surgeons. If it is His will for no surgery, no cutting, then I believe He can perform the healing process in whatever way He chooses. I pray for complete healing and deliverance from all infirmities, as I have been under severe attacks lately from the enemy camp upon my body. Please pray with me for complete healing and deliverance. In Jesus name.
